# Link Medical and Cyclopharma sign D-Spect Deal

➔ At this years SNM meeting in Toronto, Diagnostic Imaging Limited, together with Link Medical Limited, signed a UK and Ireland distribution agreement for D-Spect with Cyclopharma of France. Cyclopharma have been appointed as the European 'master distributor' for D-spect, by Spectrum Dynamics.

D-Spect is a revolutionary Gamma Camera based on Cadmium Zinc Telluride, solid state detectors. The system performance is dramatically better than any sodium iodide crystal camera with improvements in resolution of x2, energy resolution x2 and sensitivity x10. This results in better quality images with acquisition times cut to around 2 minutes for gated SPECT. Moreover, the sensitivity improvement could result in lower injected doses which will assist departments that are experiencing Tc shortages.

Left to Right

<b>John Ford</b>	Sales Director, Link Medical Limited
<b>Serge Askienazi</b>	Director of Research, Cyclopharma
<b>Bob Kenny</b>	Managing Director, Link Medical Limited
